

The manual Growcoon dispenser

Without the use of electricity: Efficient de-stacking and placing of Growcoons in trays

Growcoons are delivered compactly stacked in boxes. The manual dispenser de-stacks the Growcoons and places them in the trays along the whole width of the machine. It is easy to work with and there is no need for electricity. The number of cells per row determines the speed, which is generally around 5,000 Growcoons per hour in case of a tray with 150 cells.

Suitable sizes of Growcoons and trays:

- Length of Growcoon:
min. 28 mm, max. 45 mm
- Upper diameter of Growcoon:
min. 23 mm, max. 50 mm
- Tray size (max.):
width 400 mm, length 1,000 mm

The construction:

- Very durable because of aluminium and stainless steel construction and rotating parts with bearings
- Easy maintenance

The advantages:

- + Efficient de-stacking of Growcoons and placing in the tray
- + Suitable for different sizes of Growcoons thanks to the interchangeable dispenser parts
- + Higher capacity than manual de-stacking and placing
- + Simple operation
- + No need for electricity
- + Low budget improvement of your production speed
