

Log & Solve: Increase the efficiency of your cultivation process

Log & Solve is a digital tool for growers to collect relevant cultivation data in a central web-based platform. The new Log & Solve dashboard allows better insight in your crop to increase the efficiency of cultivation.

Advantages of Log & Solve:

- ✓ Safeguard the yield of your crops
- ✓ Improve production efficiency and reduce crop failure
- ✓ Monitor relevant cultivation parameters to anticipate crop issues
- ✓ Gain data-based conclusions for faster problem solving
- ✓ Share digital cultivation data with advisors for expert support
- ✓ Log data about cultivation measures, observations from crop walks, pictures and more
- ✓ Usable with smartphones

Log functionalities per crop

- + Automatic storage of substrate and water analyses
- + Automatic comparison of laboratory results with reference data
- + Store and share pictures of crops and observations
- + Keep notes on crops
- + Crop history
- + Information about cultivation strategies

General functionalities

- + Weather data
- + Access to the expertise of Klasmann-Deilmann's technical advisors
